### EXAMINER'S AMENDMENT

1. The original abstract was too short, and phrases that can be implied, i.e. "... is disclosed" found in the original abstract, should not be used. Therefore, the original abstract has been replaced by the following new abstract with a more proper content.

--

#### ABSTRACT

A rail car cushioning device is provided for connecting to a coupler. The rail car cushioning device includes an arrangement of a hydraulic cylinder, a piston assembly, and at least a valve assembly, which are configured with cooperating features to allow the device to be switchable between a locked mode and a cushioning mode. --.

2. The above amendment is treated as an obvious correction to minor informalities. However, should the above change be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

### REASON FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: It is noted that independent claims 1 and 24 have been amended to include a metering pin having a tapered cylindrical configuration, and they are now in condition for allowance. Note that the allowance of independent claims 1 and 24 is not determined solely on the basis of the tapered pin feature, but is rather based on the combination of the features recited in the instant claims and the relationships among said features. It is noted for example in Leben (US 6,814,348), piston 11 is provided with tapered pin 22, and Monaco (US

6,357,612), applied in the Final Office action, includes piston 46 that does not have tapered pin. However, in the instant case, it would not have been obvious to one skilled in the art to combine Leben and Monaco to arrive at the instant claimed invention because the specific features of the piston assembly and the specific features of the valve assembly in the cushioning device, as recited in the instant claims 1 and 24, inherently produce an integral operating effect that is not suggested by Leban and Monaco. Accordingly, independent claims 1 and 24, and other pending claims depending therefrom are considered to be defined over the prior art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
